EFFORTS

Those who try hard never give up,
He overcomes obstacles as soon as he takes himself
keep on trying,
who knows you might do something out of the box
Face the obstacles no matter how difficult they are,
one day you will reach your destination
If you have accomplished your goal by fighting against the challenges,
He has a different value for us
If you fail, see what is the reason for it,
and then fix it completely
Effort never goes in vain
If you are able to remove the shortcomings
No matter what your work front is,
Be smart with hard work
There are no great inventions in the world,
If scientists were not ready to experiment again and again
